

Hands-on workshop on public health analytics and disease modelling

Venue: North Eastern Hill University, Shillong, Meghalaya

Date: May 2 – 5, 2017

The goal of this workshop is to provide hand holding support to participants, by experts and facilitators, for building their skills in health analytics and disease modelling for public health research activities. Participants divided in teams will be guided to impart their newly acquired knowledge in better understanding local health situation and utilize their skills for finding solution of the local health problems. Trans/interdisciplinary research teams emerging from the workshop would be a boon for the public health domain. All teams are expected to share their research experiences in public health, participate in multi-centric research activities and disseminate their expertise in mentoring young scientists in their own institutes in future.

Facilities and Support

Full support for food and lodging and partial support for travel will be provided to selected participants. **Number of seats is limited to 16**, so candidates will be selected based on the bio-data of the applicants received.
