NEHU has a Lot to Offer: CM

he Department of Education, NEHU organised a two-day International Conference on Recent Advances in Educational Psychology on March 15th & 16th, 2018.

The objectives of the conference are to acquaint individuals with the advancement and emerging trends in educational psychology as well as to address the critical issues pertaining to this field.

Mr. Conrad K. Sangma, Chief Minister, Meghalaya inaugurated the conference in his capacity as the chief guest. In his speech, Mr. Sangma said he has a long association with NEHU right from his late father's time and has always been trying to take up the education sector forward. He termed the theme as interesting and apt for his government right now. He also informed that his government has started the process of putting up an education

policy in place. "We are trying to get it out fast," he said while lamenting the fact that even after four decades of statehood, Meghalaya is yet to have an education policy in place. "This is one of the priority areas for us and education in general is something the government will definitely be giving a lot of importance too," he added.

Commenting on the theme of conference, Mr. Sangma said the sole idea of educational psychology is something that should have been looked at from the beginning. "It's never too late but we realize how important this aspect is. Every human being is unique and I think it is that basic line that says it all", he said. "We need different aspects of education and different areas of concern are there when we look at every child or human being. Therefore educational psychology plays a very important role in that aspect. The challenge that we face

tary-General, World Gastronomy Institute (WGI), Madrid, Spain, Dr. Patrick Strefford, Kyoto Sangyo University, Kyoto, Japan and Dr. Ian Patterson of UQ School of Business, University of Queensland, Queensland, Australia.

In his welcome speech, Dr. Saurabh Kumar Dixit, STH-MCON-2018 chair, informed about the main themes of the conference. During the inaugural session, the conference proceedings along with the ISBN number were also released in both e-book and paperback form.

The STHMCON-

2018 was divided into six technical sessions and two plenary sessions covering the different dimensions of the sustainable tourism and hospitality marketing. During the technical sessions different presentations were made by scholars to highlight different aspects of sustainable hospitality and tourism marketing. The conference was attended by more than 150 delegates coming from different parts of India and globe. In total, there were 90 presentations made during the six technical sessions.

The first plenary session was held on

March 15 where two presentations were made. Titled Embracing Sustainability for Destination Competitive Advantage, the presentation was delivered by Prof. Jennifer Chan Kim Lian, Professor of Tourism and Hospitality Management, Director -Borneo Tourism Research Centre, Faculty of Business, Economics and Accountancy, University Malaysia Sabah. is how to incorporate this into a policy, how to incorporate this into a system that is already so huge and so complicated. There has to be a way forward where NEHU and other academicians will have to play a very important role in kind of getting this to the theory part and the research part into a policy making and I think that challenge is lying ahead of us," he added. "We need the output from every human being. We need to ensure that after undergoing the education process, the individual is productive in whatever manner. Ultimately we need to be happy in life."

Lauding NEHU for taking the initiative to organise a programme on this topic, Mr. Sangma said psychology does really need a lot of thought process. "We need to ensure that we incorporate these ideas into our education system and education policy. Simply because, as I said, every child is unique. And we need to ensure that not only are we addressing the uniqueness of the child but at the same time ensuring that each one is happy as well as productive at the end of the day." He hoped that the programme is a success and that the government can incorporate some of the ideas generated into the government's policy also.

The chief minister also said that the education system in the state is facing a lot of challenges. "We talk of primary schools in the villages where most of them do not have school buildings. We face a lot of challenges as a large chunk of our funds go into paying salaries for teachers and we actually do not have capital expenditure into building the required infrastructure. We are trying to find a way forward. I can assure of our commitment to education because we know that education can change the future. We are all stakeholders in the area of education.

"It starts from teachers to students, parents, government officials, politicians and it is only when we have a concerted effort then we can find a way forward and see that jump in education that we need so badly in our state. I'm hoping that it will happen."

Mr. Sangma also took the opportunity to share some of his thoughts and ideas on government policy whether its agriculture, youth and sports, education or tourism. "These are all very important sectors for us. We are very focused on infrastructure, we want roads, bridges as well as power, water supply, these are areas of big concerns for us. Big constraints ahead of us but I think with the focus and with the good team that we have, I hope we will be able to move forward. There are funds for a lot of things and I want to ensure that every rupee we spent has to be productive. There must be accountability of the money that we spent and what we spent on."

Commenting on the Look East policy, the chief minister said it's a very important aspect of his government. "Because our state has a very long border with Bangladesh, almost 480 kilometers, it's a great opportunity for Meghalaya. It is very important to have an Act South policy. We need to look south and I think that if a good policy and a framework can be there in place, trade and tourism can improve. I think we can see a great change in things and that would be one of the objectives of our government also."

Concluding his speech, Mr. Sangma said NEHU has a lot of resources and think tank, ideas that his government is trying as far as possible to incorporate. "We want to discuss with you and we know you have a lot to offer. We will require your inputs and ideas and we definitely welcome those ideas. We know you have done a lot of research on the northeast and Meghalaya especially, and that will help the government to come up with better policies so that we can do a better work for our people. We definitely want to work with NEHU, not only on education but on policy making also. I hope the association will continue with NEHU."

In his keynote address, retired Professor
