## ABOUT THE DLISC, NEHU

The Department of Library and Information Sciences was established in 1985 with a new approach to Library and Information Science education in the country. The Department introduced for the first time in the country a two-year integrated programme leading to Master's degree in Library and Information Science. The same pattern of education has now been recommended by the UGC under Model Curriculum in Library & Information Science in 2002. The University Library is being used as a laboratory for the students for practical training under the guidance of faculty members and practicing librarians. Thus, theory and practice are given equal emphasis through this integrated approach.
